

What is MealSaver?

A platform that connects

- Food Donors
- Raw material donors
- NGOs / Community Kitchens

through a fast pickup and redistribution system.

Who can Donate?

Business

- Restaurants
- Bakeries
- Cafes
- Caterers
- Supermarkets
- Vegetables Vendors.

Individuals

- Party leftover food
- Grocery Surplus
- Packaged food.

Who Receives?

- NGOs
- Community kitchens
- Shelters
- Orphanages
- Animal shelters
- low-income feeding programs.

NOT direct random individuals initially.

Biggest Problem .

□ Raw materials kaha store hoga?

→ Initially -> Mealsaver khud store nahi karega.

Instead .

MealSaver = Connector + logistic platform

Maths

- Donors uploads
- Nearby NGOs/ business accepts quickly .
- direct pickup -> direct delivery.

No Storage .

78 Then RAW Materials ka kya?

Two categories honge.

1] Short term life.

- cooked food
- bakery items
- Cut Vegetables

Ye : instant pickup ✓
instant delivery ✓
within 1-2 hr.

2] Long term life.

- Rice bags
- atta
- packaged food.
- Onions / potatoes

Ye Ngrs temporarily store kar
sakte hain.

Mealsaver only .

- Match kaarega
- Transport kaarega

27 BP 2:

Food same time kaise deliver hoga?"

this is core of the startup.

"Time sensitive logistics systems hai"

Realistic Technique.

Rule:

cooked food only accepted if

- fresh.
- properly packed.
- delivery possible within safe window.

Example

- Restaurant uploads at 7 pm
- Expiry gate till 9 PM
- Nearby NCD gets alerted instantly
- pickup rider assigned immediately

Smart Radius System.

Nearby NGOs to show Kavega.

Example

- 5 - 7 km Radius.
- Nearest First.

Operational Flow.

Restaurant uploads food.

Nearby NGO notified instantly

NGO accepts.

Delivery rider assigned

Pickup 30 min.

Delivered within hr.

Biggest Problem 3.

Delivery koun karega?

Initially own rider not possible its too expensive.

Better Option.

1] Third party delivery partner
partners.

- Porter
- Rapido
- local delivery boys.

2] NGOs pickup.

Some NGOs khud b collect karenge.

#

Problem 4:

Charges kaise henge?

Best Initial Revenue.

- Donor Pays Pickup fee.

Example: Restaurants.

"20 meals pickup"

Mealsaver charges 30 - 100 logistics fee.

Why donor pays?

- Waste disposal bhi cost karta hai
- CSR / social image milta hai
- easy disposal solution.

- CSR Partnerships

- Large companies sponsor.

- Medel drives.

- NGO redistribution.

Still

Money

Problem . . .

MealSaver Complete Process flow.

1. Registration & Verification

Donor Register.

- Restaurants
- Bakeries
- Caterers
- Supermarkets
- Vegetable vendors

They submit.

- business details
- phone number
- location
- food license

Receivers Register.

- NGOs
- Shelters
- Orphanages
- Community kitchens

They submit

- Organization details
- Service area
- Storage capability
- Contact details.

2] Donation Upload

- Food / raw material type
- quantity
- Veg / Non-veg
- cooked / raw
- preparation time
- expiry / safe usage time
- pick up address
- image.

3] Smart Matching.

MealSaver System checks

- Nearest + verified receivers
- urgency
- quantity
- Storage compatibility.

Then nearby NGOs get instant notification.

4. Request Acceptance

Receiver can : ✓ Accept + Reject

Once accepted

- donation gets reserved
- other NGO's can't claim it.

5. Pickup Assignment

System assigns

- NGO pickup : OK.
- delivery partner.

Pickup details shared.

- donor address
- receiver address
- timing
- contact number.

6. Pickup Verification.

At pickup.

- Food checked visually
- quantity confirmed
- pickup marked complete.

Optional:

OTP Verification.

7. Delivery

Receiver confirms : received ✓
quantity correct ✓
safe condition. ✓

8. Completion & Impact Tracking

System updates.

- meals saved
- kg waste reduced
- CO₂ impact
- total donation.

Donor receives:

- impact report
- contribution history.

9. Emergency Handling,

If no NAO accepts.

- donations expires
- nearby backup NAO's notified
- donor informed.

Future Expansion.

- 1] AI Freshness prediction
- 2] Route Optimization
- 3] Cold-chain partners
- 4] Carbon credits
- 5] CSR sponsorships.

One Line Workflow :-

Donor uploads surplus.

→ Mealsaves finds nearest

Verified NGO → Pickup assigned

→ Delivery completed → waste reduced.
